

**Team name : Guido's Gang**

**Team ID : T066**

**Problem statement :**

IPL 2025 WINNER PREDICTION

**Proposed solution :**

Machine learning prediction **using scikit learn** (random forest and linear regression) additionally **AI suggestions** on the venues and combinations of the **teams** . **Training the model with past records** , Will predict even in the critical condition like **key players early wickets and players dependency analysis** by balancing and Recalculating the result .

**Project outcome :**

Analyzing player performances and statistics helps understand team strategies better. Predictions increase fan's excitement and encourage discussions. Decision-Making can help fans to make correct Choices of Players about their Fantasy Teams
